about us :

The founder of the firm **Nasik Hing Supplying Co.** **Shri. Kanjibhai Nanjibhai Thakkar** is popularly known as Hingwala. He hails from Anjar, a place in Kutch, Gujarat. He lost his father in childhood, then he came to Mumbai and started his business. Once he visited Nasik as a pilgrimage place with his wife **Shrimati Muktaben Thakkar** who fell in love with Nasik and inspired him to settle in Nasik. He found that none manufactures Asafoetida i.e Hing in Nasik and so he decided to start it. He then learnt the manufacturing and marketing techniques in Mumbai worked hard and started Nasik Hing Supplying Co. four decades ago. He visualised the scope for Hing and started first in Nasik a small scale industry with Registration no 11-16-00001-PMT-SSI date: 1-2-1968 He registered his trade mark as "**Annapurna**" bandhani hing (compounded asafoetida) and the business reached to heights soon. And then is the history.

About Asafoetida:

Asafoetida (*Ferula assafoetida*) is a native of Iran. It is a herbaceous perennial plant growing to 2 m tall, with stout, hollow, somewhat succulent stems 5-8 cm diameter at the base of the plant. The leaves are 30-40 cm long, tripinnate or even more finely divided, with a stout basal sheath clasping the stem. The flowers are yellow, produced in large compound umbels.

Magical uses - It has a very bitter taste so is usually for external uses. Often used to produce an incense to banish negative energy, evil spirits and demons.

In Tarot it is used to learn the mysteries of the devil card. Also known as the food of the gods it can be used to invoke male gods, particularly of a phallic nature. Can be used to gain insight and to enhance magical work in any ritual.
